

MACHINES AND ACCESSORIES - protection and sealing

Assembly pastes and sprays

code	package capacity	description
WE-ASW-0030 (container)	30 g	Anti-Seize „High Tech” assembly pastes ensure protection against corrosion, seizure, „cold welding”, especially on stainless steel surfaces. Exhibit perfect slipping properties, resistance to salty water, acids and bases, thermal resistance up to +1400°C, high pressure resistance (to 230 N/mm ²). Eliminate squeaking and creaking, possess good sealing properties, allow for easy assembly and disassembly of components. Economical use (1 kg per ca. 40 ÷ 50m ²), free from toxic metals, NLGI - class 1.
WE-ASW-0120 (container)	120 g	
WE-ASW-400 (spray)	400 ml	

Adhesive spray greases

code	volume [ml]	description
WE-BFS-500	500	High purity medical-grade grease free of resins and acids. Developed especially for cleaning and care of clean metal surfaces in food, pharmaceutical and cosmetic industry. Holds NSF H1 certificate.
WE-AL-H-400	400	Odourless and tasteless high-temperature grease used in food industry. For ball and sliding bearing, shafts, gearings. NLGI Class 1; white yellowish colour, temperature resistant from -40°C up to +160°C. Holds NSF H1 certificate for direct contact with food.
WE-USGMO-400	400	General purpose spray with MoS ₂ . Highly adhesive and resistant to high pressures grease with MoS ₂ as an additive. Ensures smooth operation of machine subassemblies and protects against corrosion.

Leak detection sprays

code	volume [ml]	description
WE-LDS-400	400	For fast and reliable location of leaks and cracks on connections as well as gas installations and air-compressed systems. Does not cause corrosion, non-flammable and soft to the skin. Tested according to DIN-DVGW standard.

Assembly silicone

code	volume [ml]	description
WE-BS-085	85	Special silicone resistant to oils and high temperatures up to +300°C. Tube type container.

MACHINES AND ACCESSORIES - protection and sealing

Protective products

code	package capacity	description
WE-PR88-100	100 g	Hand protective cream - traditional means of skin protection at work when in contact with oily and greasy dirt as well as with strongly adhesive dirt. Protects the skin against oils, fat, lacquers, graphite, carbon black, tar, resin, polyester, silicone, and mineral fibre.
WE-PR88-100	1000 g	

Maintenance products

code	volume [ml]	description
AZ-PENETRATOR	500	<ul style="list-style-type: none"> - Excellent lubricant for precision instruments. - Penetration, lubrication, dehumidification, protection against corrosion. - Removes moisture and dries out electronic devices. - Enables unscrewing rusted screws, nuts, etc. - For surface maintenance and corrosion prevention. - Removes impurities from metal parts. - Does not contain silicones.

code	volume [ml]	description
AZ-CLEANER	500	<ul style="list-style-type: none"> - Removes fats, tar, oils, grease, dirt, adhesive remainders. - Does not contain solvents. - Does not cause corrosion.

Silicone lubricant

code	volume [ml]	description
AZ-SILIKON	500	<ul style="list-style-type: none"> - Permanent. - Does not contain petroleum oils. - Resistant to elevated temperature (up to +176°C). - Protects components. - Does not stain.
